Managing cash reimbursements for drivers' daily expenses, including fuel and tolls, can be a logistical nightmare.

Solution

Prepaid cards issued to drivers for fuel, tolls, meals, etc., all with pre-set spending limits and full visibility.

- ✓ **Example: A logistics company issues prepaid cards to drivers, who use them for fuel and tolls. The fleet manager can monitor all transactions in real-time.**
- ✓ **Benefit: Simplified payment system, reduced overhead, and clear visibility of all expenses.**

Enhancing Cash Flow for Freight and Logistics Companies

Problem

Late payments from clients and customers can create cash flow problems, making it difficult to pay drivers and cover operational costs.

Solution

Issuing prepaid cards for immediate payment to drivers and vendors, streamlining compensation and operational expenses.

- ✓ **Example:** A logistics company issues prepaid cards to subcontracted drivers after each delivery. Payments are processed in real time, ensuring drivers are paid on time, improving their satisfaction.
- ✓ **Benefit:** Instant payments lead to better cash flow management and happier drivers.

Managing Fleet Maintenance & Vehicle Costs

Problem

Unpredictable maintenance costs can be difficult to manage for large fleets.

Solution

Prepaid cards for vehicle repairs and maintenance with set spending limits for each vehicle or department.

- ✓ **Example:** A trucking company assigns a prepaid card for each truck's maintenance. Mechanics and service providers are paid directly through the cards. Fleet managers track all repairs in real-time.
- ✓ **Benefit:** Better control over maintenance budgets, clearer expense tracking, and faster payments to service providers.
